ICCM 21: Track 2.2 Multiscale Modeling of Structures

Issue 0

The 21st International Conference on Composites Materials (ICCM-21) will be held in Xi'an, China, August 20-25, 2017. ICCM, the most premier conference in the field of composite materials, aims at encouraging the exchange of the researches and insights from scientists and scholars, and promoting research, development and use of composite material and structures. You are welcome to submit to **Track 2.2 Multiscale Modeling of Structures** to share your great ideas on multiscale modeling. Please see <http://www.iccm21.org/> for more details.
